

# Water Conservation Technical Assistance Program

## Description

Sometimes one size doesn't fit all. Commercial, industrial, institutional, and multi-family customers may benefit from a customized approach to reducing their water use and costs.

Through the Technical Assistance Program (TAP), LADWP works with you to modernize your facility with the latest water-efficient equipment, save you money, and conserve our most precious natural resource.

The program offers up to \$250,000 in financial incentives for pre-approved equipment and products that demonstrate water savings.

## Benefits

- 🏠 Modernize your facility with the latest water-efficient equipment
- 🏠 Save money on your water bill
- 🏠 Conserve a precious resource

## Qualifications

- 🏠 Qualifying water conservation measures include equipment, devices, products, fixtures, and technologies that are permanent to reduce your water use.

## Details

The incentive amount is based on the water savings accomplished by the project. The incentive is calculated at \$1.75 per 1,000 gallons of water saved over a number of years depending on the project; not to exceed the installed cost of the project. Incentives are paid upon verified installation and operation of pre-approved projects.

## How to Apply

1. Customers send application and necessary measures to LADWP.
2. LADWP reviews and approves the application.
3. LADWP provides pre-inspection, sends a letter of approval, and makes a preliminary estimate of savings and rebate.
4. Customers install and operate equipment as proposed on the application and supporting documentation.
5. LADWP inspects the completed project and makes final determination of cost and savings estimates and issues the rebate.
